ENGINEERING TOMORROW

Burner components

Save time, energy and money with oil burner maintenance

Your oil burner needs the same attention as your car – it takes regular cleaning, inspection and servicing to make sure it's in perfect shape.

Danfoss produces and supplies components specifically engineered to ensure that oil burners are energy-efficient.

We strongly recommend an annual service check to improve efficiency and reduce energy costs.

Ask your installer about:
- Replacement of oil nozzle
- Replacement of main filter and pump filter

Why choose Danfoss burner components?

1. Optimum efficiency
- A well-adjusted oil burner is far more efficient
- Annual servicing and replacement of the oil nozzle ensures optimized combustion and improves fuel economy

2. Maintenance means savings
- Low investment – short payback time
- Save up to 4% in oil consumption by replacing the old oil nozzle, removing the soot in the combustion chamber and checking the combustion

3. Go greener
- Danfoss burner components use FPM seals – allowing you to use biofuel in your oil burner
- Our products work with up to 10% bio-diesel

Achieve comfort and energy savings today
