

CUSHION CLAMPS

Cushion Clamps are the industry established method of supporting copper refrigerant tube, especially for multiple pipe runs. The zinc dichromate plating provides excellent corrosion resistance and the polymer insert ensures a positive grip, absorbs shock and vibration and prevents galvanic corrosion.

THREADED ROD HANGERS

These clamps support a pair of flow and return insulated copper air conditioning pipes on either M8 or M10 threaded rod. By simply squeezing the tips together, the spring steel rod hanger can be fitted or adjusted in seconds, even after the refrigerant pipes have been installed. Black zinc coating matches the insulation colour and offers corrosion resistance.

GRIP FIT CLAMPS

The asymmetric design provides a perfect fit for any one of four pairs of flow and return insulated refrigerant pipes. An 8mm hole allows the clamps to be fixed directly to any flat surface, such as a wall or ceiling. The hinged design allows the product to be installed quickly.
