PANASONIC TOTAL SOLUTION

heating & cooling solutions

Panasonic environmental vision 2050

To achieve “a better life” and “a sustainable global environment,” Panasonic will work towards creation and more efficient utilisation of energy which exceeds the amount of energy used, aiming for a society with clean energy and a more comfortable lifestyle.

Vitalise the future with air.

These are times of exceptional challenge. If the world is to move forward confidently, it must overcome the serious threats of the new global pandemics and the degrading of the environment. It must find ways large and small to reduce the stresses that affect people's health and the stability of their communities.

Bringing nature's balance indoors.

nanoe™ X, technology with the benefits of hydroxyl radicals. In today's health-conscious world, we care about taking exercise, we care about what we eat and what we touch, we also care about what we breathe – and technology exists to bring good outdoor air, indoors.

100% Panasonic, the DNA of Japanese craftsmanship

Applying advanced technologies that truly make life better, we live by an unparalleled commitment to product quality. Panasonic is building on the Japanese tradition of uncompromising quality control worldwide, developing and manufacturing fine products and delivering them to customers everywhere.

A globally trusted air conditioning brand.

Panasonic – leading the way in Heating and Cooling. With more than 50 years of experience, selling to more than 120 countries around the world, Panasonic is one of the leaders in the heating and cooling sector. With a diverse network of production and R&D facilities, Panasonic delivers innovative products incorporating cutting-edge technologies that set the standard for air conditioners worldwide.

Editorial

Panasonic – leading the way in Heating and Cooling. With 65 years of experience, selling to more than 120 countries around the world, Panasonic is one of the leaders in the heating and cooling sector.

Bringing nature's balance indoors.

nanoe™ X, technology with the benefits of hydroxyl radicals that have the capacity to inhibit pollutants, viruses, and bacteria and deodorise.

Commercial air to air - PACi

The commercial range is continuously being improved to offer the optimal solutions. High performance, silent operation and a wide range of indoor units and connectivity available.

New Jet Air Stream.

The new PACi NX indoor units designed for large spaces that require high air distribution, such as gymnasiums, production areas, and warehouses. They ensure optimal user comfort, a quiet environment, and are much easier to install than other systems.

Domestic

Panasonic has developed a range of domestic products designed for you and your clients.

Etherea: a very welcome addition to your home.

The smart, Etherea comes with the nanoe™ X (Generator Mark 3) and built-in Wi-Fi which enables advanced smart control and voice assistant, now with an easier and quicker set-up.

Ventilation

Panasonic ventilation solutions for maximum savings and easy integration.

Energy recovery ventilation.

Panasonic energy recovery ventilations (ERV) help to improve your comfort and energy-saving plan. Introducing the ERV with DX coil - HRPT Series, specifically designed for commercial applications or collective residential buildings, offering highly efficient heat recovery.

Commercial VRF Systems - ECOi and ECO G

Panasonic provides an extensive range of solutions for medium and large sized buildings, combining the best options to satisfy all needs and site restrictions.

Mini ECOi LZ2 Series R32.

Outstanding efficiency in a compact body and continuous operation even at extreme ambient temperatures.

Refrigeration

Panasonic CO₂ condensing units. Natural refrigerant solution for showcases and cold rooms. Reliable quality - made in Japan.

CR Series 20 HP MT/LT model.

The CR Series now includes a 20 HP medium/low temperature model, a highly efficient multi-compressor solution. The smaller footprint of the unit and the maximum piping length of 100 m allow for flexible installation in light refrigeration projects.

Award winning solutions for all applications

nanoe™ X, technology with the benefits of hydroxyl radicals.

In today's health-conscious world, we care about taking exercise, we care about what we eat and what we touch, we also care about what we breathe – and technology exists to bring good outdoor air, indoors.

Cumulative global shipments of nanoe™ devices exceed 100 million units*

* From July 2024, the results apply to all other products with nanoe™ X devices, including heating and cooling.

Effective on fabrics and surfaces.

1 | At one billionth of a metre, nanoe™ X is much smaller than steam and can deeply penetrate cloth fabrics to deodorise.

Longer lifespan.

2 | Contained in tiny water particles, nanoe™ X has a long lifespan, which is about 600 seconds, to spread easily around the room.

Huge quantity.

3 | nanoe™ X Generator Mark 3 produces 48 trillion hydroxyl radicals per second. Greater amounts of hydroxyl radicals contained in nanoe™ X lead to higher performance on inhibition of pollutants.

Maintenance-free.

4 | No service and maintenance required. nanoe™ X is a filter free solution that does not require maintenance, as its atomisation electrode is enveloped with water during its generation process and it is made with Titanium.

7 effects of nanoe™ X

PRO Club. The professional website of Panasonic

Panasonic has an impressive range of support services for designers, specifiers, engineers and distributors working in the heating and cooling markets.

Aquarea Designer - online tool

With Panasonic's online tool, projects can be developed simply and easily. The developed tool is optimised to help HVAC professionals easily identify the most appropriate Aquarea air to water heat pump for a particular application.

Residential ventilation selection tool

The tool contains all the information the HVAC professionals need for their residential ventilation projects (specifications, technical manuals, etc.) as well as a calculator of the performance curves.

Panasonic DX PRO Designer

The Panasonic DX PRO Designer will be rebuilt with an improved user experience. The software runs in the cloud and is always up to date with the latest products. An intuitive interface supports the most complicated designs, allows online sharing and project collaboration with multilingual support.

AC SELECT

Use AC SELECT to choose and configure your hydronic solution. Panasonic online selection tool offers an easy and quick solution to specify all the hydronics ranges and rooftops at required conditions.

Refrigeration designer

This easy to use design tool supports engineers, installers, and technicians to make a quick calculation for commercial refrigeration systems.

BIM & AutoCAD Support

Panasonic offers a wide range of HVAC&R products with BIM (Building Information Modelling) objects in Revit format and AutoCAD files, providing comprehensive support for design offices, consultants, and installers in planning projects.

Panasonic domestic air to air heat pump

Panasonic has developed a range of products designed for you, better than ever before. Above all, it is also a range for air conditioning professionals, such as yourself, thanks to its broad range of products which are capable of conditioning rooms of all sizes – always with optimal efficiency and incomparable ease of installation.

Hi-durability outdoor units

Panasonic RAC, PAC and VRF outdoor units have been treated for high resistance to corrosion (rust and salty air) to ensure long-lasting performance. No need for expensive and time consuming third part coatings. Tests have been completed under the norm ASTM B117 for 1000 hours.

Specially protected parts.

Note: Selecting this unit does not completely eliminate the possibility of rust developing. For details concerning unit installation and maintenance, please consult an authorised dealer.

Welcome to the connected world of Panasonic Comfort Cloud App.

Whether you are at home or at work, the Panasonic Comfort Cloud App puts total control of your indoor air quality at your fingertips.

- Remote control. Control and monitor your air conditioners anytime, anywhere
- Monitor energy consumption. Check the energy consumption of each individual unit across different time intervals by comparing the energy usage patterns to maximise energy savings
- nanoe™ X: improving protection 24/7*. Switch on nanoe™ X mode with cooling OFF / ON and see the nanoe™ X coverage in your space through a simulation

* Only for units compatible with nanoe™ X function.

Voice Control. Words do more than actions.

Boundless control and hands-free help to access all the features of your air-to-air heat pump.

Maximising your comfort is now a breeze with our connected air conditioners using the Panasonic Comfort Cloud App and voice control.

New Power Heat Multi system.

Powerful heating and cleaner indoor air from a single outdoor unit. The multi split system engineered for cold climates.

Powerful heating of two or three rooms with one outdoor unit, even at -25 °C low outdoor temperatures.

The multi split solution offers high flexibility, as 2 to 3 indoor units can be connected to a single outdoor unit.

Reliable heating for the coldest winters.

Reliable heating
even at -25 °C.

Equipped with base
pan heater.

Compatible with
Etherea indoor units,
with nanoe™ X.

Reduces the burden of aesthetics, installation and maintenance.

Seamless
integration of
outdoor unit.

Reduced
installation time.

Excellent
maintainability.

Check out the installation of the
Power Heat Multi system at the Arctic
Treehouse Hotel in Lapland, Finland.

1) Under the condition with outdoor 35 °C (DB) and indoor 15 °C (WB). The CONEX controller CZ-RTC6(-BL/-BLW2) is required. 2) Available in all configurations: Smart, Standard, and Ducted. The CONEX controller CZ-RTC6 (-BL/-BLW2) required for setup. However, the operation controller is built-in.

Cold room solutions with PACi NX Series. Temperature control at 8 °C.

The PACi NX series offers flexibility for specialised applications, beyond standard cooling. This product can maintain room temperatures between +8 °C and +24 °C WB (or +10 °C and +30 °C DB). To achieve this, the indoor unit must be sized for adequate coil and airflow requirements, and key parameters adjusted accordingly.

Wired remote control.

Ceiling mounted air-e nanoe™ X Generator

Bringing nature's balance indoors.

Deodorises and inhibits certain bacteria, viruses, mould, pollens and allergens for better indoor air quality.

air-e™

One device is suitable for around 20 m² (with a ceiling height 3 m)

Ex. 3 air-e devices are required for the room size 60 m².

The nanoe™ X performance varies depending on the room size, environment and usage. nanoe™ X is not a medical device.

Smart multi-site control solution.

Modern and scalable energy management for your Heating & Cooling Solutions.

The smart multi-site control solution allows you to have complete control of all your installations. With a simple click, all your units from several locations, receive status updates in real-time preventing breakdowns and optimising costs.

Installation.
Easy installation and configuration.

Connectivity.
A standard LAN connection with internet access (fibre or mobile).

Reliability.
24/7/365 days connection.

Use.
Real-time control from anywhere.

Roles and permission.
Easily configure different access roles for each user.

Security.
Highly secure communication and compliant with GDPR.

New **2025****2-Pipe ECOi EX MZ1 Series R32.****Extreme efficiency, quality, compact.**

With advanced R32 refrigerant technology and optimised system design, this series offers a more sustainable solution compared to R410A.

- Compact outdoor unit with a significant 43% ¹⁾ footprint reduction, delivering high seasonal efficiency, reliable quality, and R32 standard compliance
- The series uses 57% ²⁾ less R32 refrigerant than R410A, minimizing the need for extra safety measures
- Extensive R32 Range with all air-to-air indoor units equipped with nanoe™ X, along with ERVs, AHU connection kits, and a hydronic module option for heating and hot water production
- A wide range of connectivity options, including stand-alone, central, and remote monitoring, with BMS integration for seamless operation

1) 12 HP model compared to the equivalent conventional R410A ECOi EX ME2.

2) Panasonic's internal research. 12 HP model with 30 m piping installation.

ERV with DX coil - HRPT Series.

- Dual flow ventilation with EC fan, featuring high efficiency heat recovery (>85% η)
- 2 types of polypropylene heat exchanger (high efficiency and sensible) with counter-current flows and integrated bypass as standard
- Modbus connection available

BION air pollutant filter.

IAQ solution filtering certain types of pollutants, such as nitrogen dioxide (NO₂), nitrogen oxides (NO_x) and ozone (O₃). Designed for the F3 type adaptive duct.

Mini ECOi LZ2 Series R32.

Outstanding efficiency in a compact body and continuous operation even at extreme ambient temperature.

- Low GWP and less refrigerant
- SEER up to 8,50 and SCOP levels up to 5,05 ¹⁾
- Operation range down to -20 °C in heating and up to 52 °C in cooling
- Optional R32 safety measures and Pump Down System available

1) 4 HP model.

Electricity or Gas or Hybrid? Various VRF technologies satisfy your project needs.

- VRF ECOi EX Series: A game-changing VRF system delivering outstanding energy-saving performance. Available in 2-Pipe (8 - 80 HP) and 3-Pipe (8 - 48 HP) system
- Gas driven VRF, ECO G Series: For the project location with lack of electricity. Available in 2-Pipe (16 - 60 HP) and 3-Pipe (16 - 25 HP) system
- Hybrid GHP/EHP taking advantage of gas and electricity to achieve better energy savings

Air to air indoor units with nanoe™ X.

- For better indoor air quality
- Quick effect in even large space
- Bacteriophage inhibition 99% in 4 hours at the room size 139 m² ¹⁾
- nanoe™ X is a filter free solution that does not require maintenance

1) [Test organization] SGS Inc. [Test subject] Adhesive virus (bacteriophage) [Test volume] 139 m³ [Test result] Inhibited 99% in 4 hours [Device type] nanoe™ X Generator Mark 3, Internal unit: 4 way cassette.

Hydraulic solution for VRF projects.

- Water heat exchanger for chilled and hot water production. It's ideal for hotel project. Maximum hot water outlet temperature 45 °C with ECOi EX and 55 °C with ECO G
- Hydrokit for the medium water temperature application. Maximum hot water temperature 45 °C

1) SEER / SCOP and $\eta_{s,c}$ / $\eta_{s,h}$ are in accordance with ErP test data for U2 type 4 way 90x90 cassette indoor units. 2) SEER / SCOP is calculated based on the seasonal space cooling / heating efficiency "η" values of the COMMISSION REGULATION (EU) 2016/2281. SEER, SCOP = (η + Correction) × PEF.

The Panasonic DX PRO Designer, rebuilt with an improved user experience. The software runs in the cloud and is always up to date with the latest products. An intuitive interface supports the most complicated designs, allows online sharing and project collaboration with multilingual support.

New generation of 2-Pipe ECOi EX MZ1 Series R32

Extreme efficiency, quality, compact.

Panasonic provides safety measure compliant with the latest standards, as required based on R32 refrigerant density under specific project conditions. Everything necessary for R32 refrigerant safety is prepared by Panasonic.

Reliable quality - R32 standard-compliant ¹⁾.

Flexible piping installation.

Maximum indoor / outdoor capacity ratio 200%.

Saving installation cost.

1) Panasonic's R32 safety measures comply with IEC 60335-2-40 [ed. 7.0] and EN 378 (ISO 5149). 2) U-10MZ1E8. 3) Compared to R410A systems.

Extensive R32 range to meet any project requirements.

- All air to air indoor units are equipped with nanoe™ X for improved indoor air quality
- Hydronic modules options enable the production of heating / hot water
- A range of ventilations including ERVs and AHU connection kits
- A wide range of connectivity options, including stand-alone, central, and remote monitoring, with BMS integration for seamless operation

R32 safety measures by Panasonic.

Leak detector - CZ-CGLSC2.

Leak detector designed for 4 way 90x90 cassettes, 4 way 60x60 cassettes, and wall-mounted units.

Leak alarm - CZ-CGLALC1.

R32 refrigerant leak alarm designed for adaptive duct and slim duct units.

2-pipe safety valve kit - CZ-P1160SVK.

A 2-pipe safety valve manages the shutdown of only the area / zone experiencing a refrigerant leak, instead of shutting down the whole system.

External power supply - PAW-16DC-ALC1.

External 16 V power supply (EN 378 compliant), including a leak alarm for remote locations. The leak alarm can be deactivated.

ECOi EX Series R410A

VRF with outstanding energy-saving performance and powerful operation SEER 7,56 (2-Pipe 18 HP model).

The ECOi EX Series delivers energy-saving performance, powerful operation, exceptional reliability, and comfort that surpasses anything previously possible.

High performance at extreme conditions.

The units can operate at 100% of capacity at 43 °C, reaching a great cooling operation up to 52 °C and in heating to -25 °C*.

* Conditions of 2-Pipe ECOi EX ME2 Series.

Outstanding efficiency and comfort.

The ECOi EX system is designed to increase energy efficiency by delivering high SEER rating, as well as high efficiency for part-load operation.

Superior flexibility.

ECOi EX, the ideal air conditioning option for expansive buildings, such as train stations, airports, schools or hospitals.

1) SEER / SCOP and $\eta_{s,c}$ / $\eta_{s,h}$ are in accordance with ErP test data for F2 type variable static pressure hide-away indoor units. 2) SEER / SCOP is calculated based on the seasonal space cooling / heating efficiency "η" values of the COMMISSION REGULATION (EU) 2016/2281. SEER, SCOP = (η + Correction) × PEF.

Smart multi-site control solution.

Modern and scalable energy management for your Heating & Cooling Solutions.
With a simple click, all your units from several locations, receive status updates in real-time preventing breakdowns and optimising costs.

Installation.
Easy installation and configuration.

Connectivity.
A standard LAN connection with internet access (fibre or mobile).

Reliability.
24/7/365 days connection.

Use.
Real-time control from anywhere.

Roles and permission.
Easily configure different access roles for each user.

Security.
Highly secure communication and complaint with GDPR.

Bringing nature's balance indoors.

All R32 air to air indoor units are equipped with nanoe™ X (Generator Mark 3) for improved indoor air quality.

The nanoe™ X Generator Mark 3 produces the highest amount of hydroxyl radicals in nanoe™ history, generating 100 times more than traditional nanoe™. This increased concentration enhances nanoe™'s cleaning power, delivering superior performance.

Panasonic ventilation solutions

Panasonic ventilation solutions for maximum savings and easy integration.

AHU connection kit MAH4M for ECOi 2-Pipe.

- Space-saving compact casing
- Direct Modbus communication without the need for an additional interface
- Accurate control with a pressure transducer

Advanced energy recovery ventilation - ZY Series.

Extended line-up covering 2000 m³/h model meet a variety of commercial uses.

- F7 grade filter built-in all models
- Independent motors equipped for air supply / exhaust
- Easily adjust air volume balance - 4 speeds setting for air supply / exhaust
- Intuitive control design
- BMS connection available (RS485 built-in controller)
- **NEW** IAQ Controller for enhanced air quality, reduced energy consumption, and auxiliary heater control

Air curtain with DX coil.

- Line-up available for PACi and VRF system
- Compatible with R32 and R410A refrigerants
- Simple structure for easy installation and maintenance

Ceiling mounted air-e nanoe™ X Generator.

First standalone nanoe™ X Generator available. Compact and modern design match well into any ceiling materials.

- Quiet operation - at 27 dB(A)
- Low power consumption
- Easy Installation
- nanoe™ X is a filter free solution that does not require maintenance

Close Control and Vertical DX units

Close Control units provide a strict control of environmental conditions such as temperature, humidity in data centers, laboratories, and other applications where sensitive equipment or processes require stable and controlled conditions.

Vertical DX units can be used in industries, data centers and tertiary application thanks to their high reliability, high efficiency and low noise level.

TECNAIR
A Panasonic Company

Different versions for data centers applications:

CCUs small footprint and the possibility of modulating operation for all components allow the development of solutions tailored to the real needs of the infrastructure.

P Series: Perimetral and compact solution.

G Series: Perimetral and high efficiency solution for large data centers.

R Series: In-row solution.

W Series: Technical corridor solution.

Precise control of temperature and humidity.

CCUs are designed to provide precise and stable control over temperature and humidity levels. This is crucial in environments where even small variations can have a significant impact on equipment performance or the quality of processes.

Flexibility, reliability and advanced remote control.

CCUs are flexible solutions that can be customised to fit the specific requirements of data centers applications. These environments also require high levels of reliability. Real-time remote monitoring and control of all unit operating cycles thanks to a simple and intuitive large colour display and touch keys.

Vertical DX units.

This range of monobloc cabinets has the particularity of extremely simplified implementation and maintenance. They have a small footprint, high reliability and efficiency which combined with low noise level make them particularly well suited for cooling, heating and air filtration in industries, data center and tertiary application.

CO₂ condensing units - CR Series with natural refrigerant

Panasonic's CO₂ condensing units - CR Series provide the ideal solution for supermarkets, convenience stores and gas stations. Keeping food always fresh at right temperature in showcases or cold rooms is a very critical point. And one of the biggest challenges for those retailers has been the expensive effects of refrigeration breakdowns which can result in costly product wastage.

CR Series 20 HP MT/LT model.

- Multi-compressor system
- Smaller footprint
- Maximum piping length of 100 m
- Cooling capacity can be controlled from 25 to 100% under partial load

CO₂ transcritical condensing units - CR Series.

- Reliable quality - made in Japan
- Set-points at medium or low temperature available depending on applications
- 2-stage compressor with the split cycle for increased efficiency
- High seasonal performance and high COP at high ambient temperature

Compact control panel and electric expansion valves (EEVs).

- A compact intelligent controller has the smart program especially for cold rooms
- 7 different sizes EEVs are ready to meet precisely the field demand

Easy and quick installation.

Pressure release valves and a range of optional accessories support fast and efficient installation.

CO₂ service checker.

- Useful tool supporting daily technical tasks on the field such as commissioning
- Reading and recording variable technical parameters
- Monitoring an alarm status

Design support tool available in Panasonic PRO Club.

- Supporting engineers and installers to make a quick calculations when specifying the project
- Ready to work on all computers, tablets and smartphones

Superior cooling capacity at each evaporating temperature.

CO₂ transcritical condensing units - CR Series have a high cooling capacity at each set point. The CO₂ 2-stage compressor developed by Panasonic is designed to compress CO₂ refrigerant twice; it reduces the load in operation by half (compared to 1-stage refrigerant compression) and delivers increased durability and reliability.

Units can be programmed to run at low and medium temperatures at initial set-up. These settings can then be modified by turning a simple and user friendly rotary switch to further enhance energy savings.

Showcases.

Convenience stores, supermarkets, gas-stations.

Cold room application to keep food fresh

Multiple installation capabilities. Unparalleled flexibility:

- Food retail applications (convenience store, supermarkets, gas-stations)
- Food service applications (restaurants, canteens, schools)
- Non-food applications (warehousing, industrial storage, healthcare)

Cold room application integrated with PACi NX Series

Panasonic offers various solutions for cold rooms by combining a wide range of products. Integrated with PACi NX Series, it allows for flexible design and installation.

CO₂ condensing units - CR Series for refrigerated room.

PACi NX Series for cooling rooms between 8 °C WB and 24 °C WB.

4 & 5 series indoor units: Above is a table showing the current Panasonic equivalent for each Sanyo indoor model. Indoor units can be added or replaced without any setting changes.

Please note there have been design changes therefore dimensions and appearances will not be the same. Please check in technical manual.

3 series indoor units: When using a current Panasonic R410A outdoor and mixing the current Panasonic indoors with 3 series Sanyo indoor units on the same system, you will need to access the detailed settings to change code 15 to 0029 on the Sanyo indoor units.

Please be advised that when replacing Sanyo outdoor unit with any U-***MF3E8 outdoor unit. It is necessary to take into consideration that the discharge pipe length is required for additional refrigerant charge.

In almost all circumstances it is possible to replace old Sanyo units with current Panasonic models however, each Sanyo generation has different criteria to consider when replacing. Below we have outlined how to replace each generation.

To amend the setting you will need a standard controller CZ-RTC4 or CZ-RTC5 and a maintenance cable PAW-MRC which allows you to plug the controller on the outdoor PCB. Once connected follow the procedure below to change the code.

Please contact Panasonic Technical Department before proceeding.

VRF - 3 Series 3-Pipe - R407c

Sanyo reference	Panasonic equivalent
SPW-CR703GZH8	U-8MF3E8
SPW-CR903GZH8	U-10MF3E8

This generation runs on R407c refrigerant so it is always best practice to replace all equipment and take advantage of Panasonic's renewal technologies. However in situations where this is not feasible then it is possible to replace indoors and also outdoor units with conditions. When carrying out these replacements it is particularly important to check the wall thickness and integrity of the pipework is appropriate for re-use and that standard renewal procedures are followed.

NOTE: The new R410A system will run at a lot higher pressure than the existing R407c system therefore it is necessary to change a setting on the outdoor unit which will restrict the running pressure to the lower value associated with R407c refrigerant. As a further fail safe it is recommended to replace the high pressure switch, the part number for this is CZ-PSWK2.

Please be advised that when replacing Sanyo outdoor unit with any U-***MF3E8 outdoor unit. It is necessary to take into consideration that the discharge pipe length is required for additional refrigerant charge.

Care must be taken when replacing SVK boxes due to variation of wirings. The Sanyo kit used a cable with additional connectors. Please check wiring and spare parts for differences.

The above is for guidance only, please contact your usual sales representative before proceeding with Sanyo replacement for up to date advice.

LonWorks® interface	SHA-LN16UGB	CZ-CLNC2
Web interface	SHA-KW64EG	CZ-CWECB2

All local controls work via the same 2 core cable as current Panasonic controllers meaning they can easily be replaced for new controllers. The appearance of the new Panasonic controls have changed and also not all of the new features will work on existing Sanyo equipment (i.e. energy monitoring on CZ-RTC5B).

The same applies for system controls and other interfaces which operate using 2 core communications (U1,U2) therefore new replacements are compatible just some of the new features may not be available.

Warranty terms and conditions

Please speak to us about on site training courses.

The Standard warranty

3 years parts and labour (A2W exc. Labour).

- The unit should be installed by a competent person
- The installation instructions supplied with the unit must be followed
- Annual maintenance records must be kept

The Extended warranty

5 years parts and labour.

- The unit should be installed by a competent person
- The installation instructions supplied with the unit must be followed
- Annual maintenance records must be kept
- The installer must have completed the relevant Panasonic training
- The installer must register the unit on PRO Club (VRF and A2W units require additional commissioning documentation uploading onto PRO Club)

The Extended+ warranty

7 years parts and labour.

- The unit should be installed by a competent person
 - The installation instructions supplied with the unit must be followed
 - Annual maintenance records must be kept
- The installer must have completed the relevant Panasonic training
- The Installer must register the unit on PRO Club (VRF and A2W units require additional commissioning documentation uploading onto PRO Club)
 - A2W units must be installed with a CZ-TAW1C adapter*

* CZ-TAW1C Installation is mandatory on all Air to Water installations for 7 year warranty to be granted. For retrofit installations, the CZ-TAW1C must be installed and the smart cloud service activated. For new build installations, smart cloud activation is not mandatory for the 7 year warranty to be granted.

Where do I register my unit for warranty?

Warranty registration can be completed through the PRO Club platform.
