

Choose responsible refrigerant recovery

Including Prices

Daikin UK presents a unique on-site F-gas recovery service solely for D1/D1+ Partners. Offering on-site F-gas recovery, Reclaim with confidence is available via A-Gas Rapid Recovery, exclusively in partnership with

Recovery machine in action on-site

Benefits:

- › Direct recovery of F-gases¹ on-site
- › On-site time saving of up to 70%²
- › No need to rent recovery cylinders
- › D1 Business Development Fund credit, based on amount of R410A recovered
- › Certificate provided for end user
- › Fully trained and equipped operatives for safe on-site operations

The offer

Exclusively in partnership with A-Gas Rapid Recovery, Daikin UK offers a refrigerant recovery service for all F-gases¹, ensuring refrigerant can be recovered safely and efficiently from your systems and removed from site for reclaiming.

The recovery machine can be wheeled into place or deployed directly from the vehicle, using a hose up to 250 feet long, giving complete flexibility for any site conditions. The system is then available for decommissioning if at the end of its life, or for repair and recharging with fresh gas³.

F-gases and the circular economy

The F-gas regulations mean that the quantity of virgin gas available as part of the F-gas quota for charging DX systems will gradually reduce over the coming decade. Reclaimed product has zero impact on the quota, so it is more important than ever to reclaim F-gases from all current systems.

This gas can be analysed, cleaned, rebalanced and separated as required to ensure as much as possible is available for future use. Daikin is committed to helping the industry make this happen.

¹ A2L refrigerants to be included from January 2023

² Based on case study: Bristol Water

³ System recharging to be carried out by the Installer, not as part of Reclaim with confidence

Service offer

At Daikin UK, our aim is to meet and exceed customer expectations, so please see full details of the Reclaim with confidence offer. Once an order has been received, A-Gas Rapid Recovery will contact you directly to agree a time and date for the site check (if required) or to go ahead directly with the recovery, once the details are agreed between you.

Details of service offer

Initial contact with customer (following email enquiry)	Within 4 working hours from enquiry being received (office hours 8am to 5pm)
Order confirmation of date and time	Following confirmation from A-Gas through phone or email contact
Provision of job site reports and certificate	Following up from the recovery, we'll email you the certificates
Service support	Telephone and email support 8:00am to 5:00pm from A-Gas, with a messaging service outside of these hours. Emails received outside of office hours will be actioned on the next working day
Weekend service	Available on request

Pricing schedule

The pricing is per visit based on the total F-gas quantity on site that is recovered.

Material	Gas collected	Trade Price
UK.RRS SMALL	<20 kg	£265.00
UK.RRM MEDIUM	21-100 kg	£295.00
UK.RRL LARGE	101-200 kg	£390.00
UK.RRW WEEKEND	Weekend callout additional surcharge (per visit)	£150.00

For recovery projects of more than 201 kg, the total price will be made as a combination of the above charges, e.g. 250 kg would be £295+£390=£685 total, or please contact Daikin directly for a quote.

Business Development Fund credit

For every kg of R410A recovered, £3 will be credited to your D1 Business Development Fund for the following year.

Legislative requirements and certification

Following removal of the F-gases from site, a full report and waste certificate will be available. The certificate will be emailed to you, so you can share it with your end client for their records and to prove that the refrigerant has been removed safely for reclaiming.

Additional terms and conditions

Excludes Northern Ireland and Channel Islands.
Additional charges may apply for other Island locations.
Please see website for service specific T&C's.

Customer process:

- › Log onto the D1 portal and access Climate360 Reclaim under 'Resources and Tools' page: <https://d1.daikin.co.uk/resources-and-tools>
- › Complete online form
- › Submit form with order and full details of site
- › Following receipt of the confirmation email, you will receive a call from A-Gas confirming requirements
- › Once date and time have been confirmed with A-Gas, the Rapid Recovery vehicle will attend the site
- › Following recovery, a certificate will be emailed to you

About A-Gas Rapid Recovery

A-Gas offers market-leading recovery and reclamation services and has over 25 years' experience in the supply and lifecycle management of refrigerants, service gases and associated products. They have specialist facilities to handle many different types of refrigerant as well as a national fleet of Rapid Recovery vehicles available to support the 'Reclaim with confidence' service and an expert team fully trained in safe and effective F-gas recovery from Daikin equipment.
