

## NEW PRODUCT RELEASE

Control system / Wired remote controller

Model:  
**UTY-RVRY**

### Harmonizes with the Installation Space

When not in use, the controller is a part of the interior décor.

This is achieved by using mirrors, glass, and clear panels, and it appears to be one with the wall.

The sleek and stylish design won the 2022 Good Design Award and was selected as a finalist for the 2023 IDEA award.

### Intuitive Operation

The touch screen is easily operated by swiping vertically and horizontally, and users can operate the controller without using manuals.

## Status LED Clolors

When not in use, the operation mode is indicated through LED lamp colors shown under the controller. The LED lamp can be switched ON and OFF to avoid glare at night.

Blue: Cooling

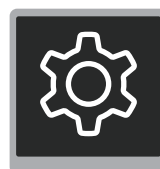

Red: Heating

Green: Dry

Purple: Auto

## AIRSTAGE Remo Set

It is an application for technicians to set up the controller via smartphone. The initial controller settings and indoor unit function settings can be sent from a smartphone by pairing with the controller via Bluetooth, significantly reducing installation time.

Smartphone

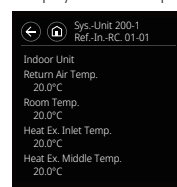

Wired remote controller

## Refrigerant Cycle Monitor

The controller will display specific sensor values of outdoor and indoor units for maintenance and service support.

Wired remote controller

## For Hotel Use

### Logo Display

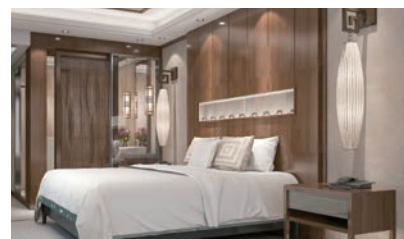

The controller can display hotel logos when not in use. Images are sent via Bluetooth connection where data is saved in the flash memory built into each controller.

Bluetooth

Wired remote controller

### Limited Visibility of Settings

The controller can disable the display of specific settings on the screen so that hotel guests cannot change system settings.
