Weekly timer

Centralized operation for flexible remote management of all air conditioners

---

AIRSTAGE Mobile is ideal for a wide range of applications, from large residential buildings to smaller commercial spaces such as offices and stores. Anyone who has a smartphone and an adapter can easily install the system at a low cost.

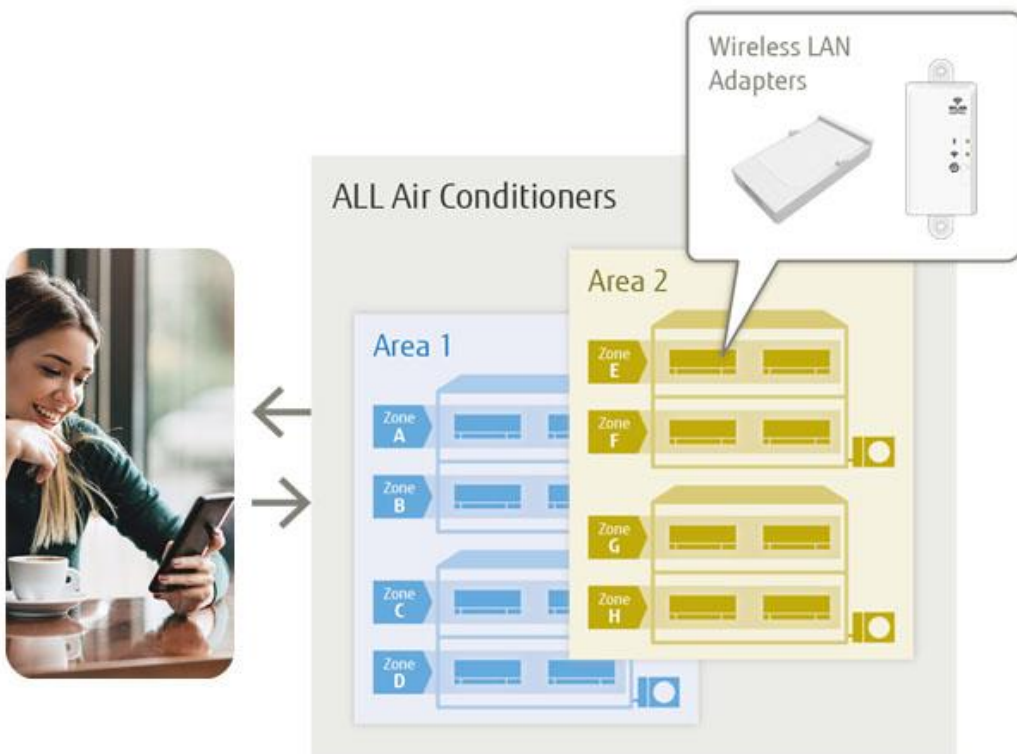

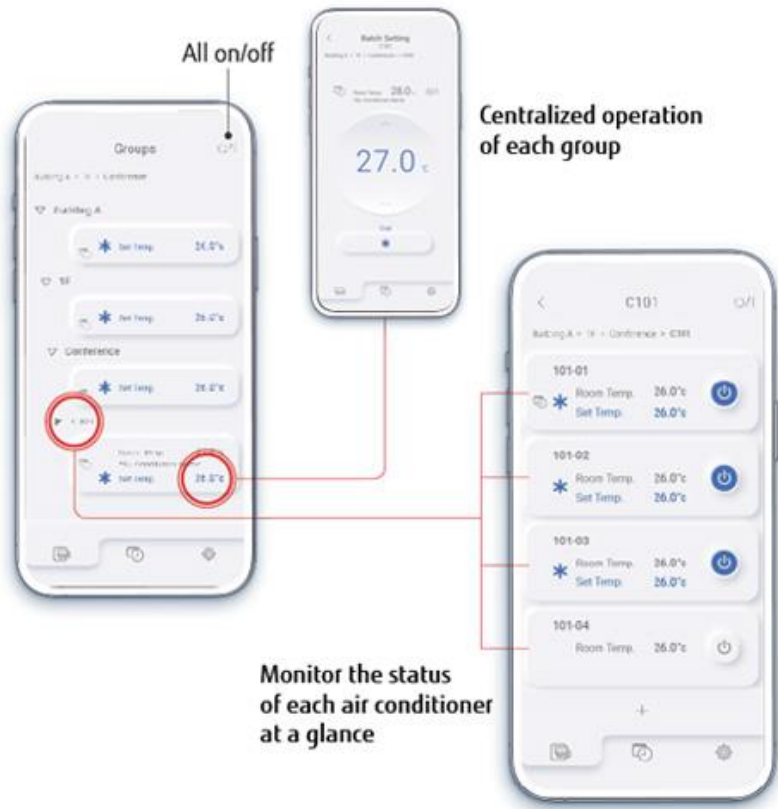

Maximum of 5 user accounts can be set per 1 indoor unit, including the main user and sub users.

## Hierarchical group management

---

Multiple air conditioners can be combined into a single group for centralized operation. Several groups can also be organized at once. Grouping the air conditioners by building, floor, or room makes it easy for users to monitor their operation status and operate them quickly.

# Air conditioner control and operation status check just by talking to the smart speaker

Connecting with a smart speaker allows the user to operate the air conditioner and check its operation status just by talking to it.
