

Clip Rail for 16-17mm Pipe - 1m Rail

OF-0028

Product Description

Designed for the installation of underfloor and wall heating systems, the Oceanfloor clip rail provides a secure and stable method for pipe fixing. Each 1000 mm rail is supplied as two 500 mm sections and fitted with a self-adhesive backing to allow quick and accurate positioning on insulation boards or subfloors. Manufactured from high-impact polypropylene, the rail offers high durability, dimensional stability, and resistance to mechanical stress.

Suitable for both domestic and commercial applications, it ensures precise pipe alignment and long-term performance in heating system installations.

Product Features

- Clip rail for underfloor and wall heating systems
- Self-adhesive backing for quick and secure installation
- Supplied in 1000 mm lengths (2 X 500 mm sections)
- Made from high-impact polypropylene for strength and durability
- Ensures precise pipe alignment and long-lasting stability
- Ideal for domestic and commercial heating installations
