

Talon Rubber Lined Clips

Rubber Lined Clips

Our Rubber Lined Clips are an essential part of any professional pipe installation. They are the ideal product for the suspension of both rigid and copper tubing using threaded rods and studs. Our clips are expertly designed to fit two sizes of suspension rods. They are supplied with a dual-base thread, meaning they will accommodate both 8mm (M8) and 10mm (M10) standard suspension rods and studs. They are adjustable, which ensures they will fit all pipe sizes. The rubber lining 'hugs' the pipe as well as acting like a noise restraint, minimizing the risk of any rattling or movement in the pipework.

- **EDPM Rubber certified**
- **Will not decay under UV light**
- **No pipe rattling, clangs or vibrations**
- **Zinc plated - prevents clips from rusting**
- **Removable rubber lining**
- **Fit with just 1 screw**
- **Resistant to high temperatures**
