

Design Simulator (Software only)

Course 4b

Dates: See Calendar - Page 14

Maximum no. of Delegates: 8

Minimum no. of Delegates: 4

Who Should Attend

This course is valuable for anyone involved in the application and design of Fujitsu VRF systems. The course is primarily aimed at Consultants, Specifiers, Sales Engineers and Contracts Engineers.

Course Objectives

Obtain sufficient knowledge for the designing and selection of VRF systems using Design Simulator.

Location: Demonstration Room 2
FG Eurofred Limited
Centennial Park

Time: 09.30 to 13.30

Duration: Half Day

Course Summary

Throughout this course, with the use of extensive hands-on exercises, the delegates will:

- Configuring Design Simulator.
- How to select Split, VRF and DX systems.
- Design a complete VRF system.
- Calculate additional refrigerant charge.
- Create reports and quotations.
- Saving and updating.
- Questions and Answers.
